These charges may be bank charges, foreign exchange differences based on the exchange rate of currencies, and so on. The provisions included in the Fund's Rules (Section 4) shall apply to joint accounts.

The information in this Prospectus and in particular the information relating to cash payments made to shareholders is provided in every Member State of the European Union where the investor shares of the Fund are sold, and is included in the Prospectus published there.

7. RISK MANAGEMENT

The Risk Management framework of the Fund is determined by the Investment objectives, Policy and Strategy of each Sub-Fund. Therefore, more information with respect to the Risk Management approach is provided in Section C with Sub-Fund's particulars.

8. PREVENTION OF MARKET TIMING & LATE TRADING PRACTICES

1. The Management Company does not accept applications to purchase or redeem investor shares when there are indications of market timing or late trading practices, which are not in the interests of shareholders.

2. Late trading entails submitting an application to purchase investor shares in a Sub-Fund or an application to redeem investor shares after the point in time when the net asset value (NAV) of the Sub-Fund has been computed, and consequently after the point when the price of the investor shares on that specific date has been fixed (the cut-off time). By doing so, the originators of instructions can exploit knowledge of events for personal gain, or for the benefit of third parties on whose behalf they are acting.

3. Market timing indicates that arbitraging is at play, whereby the investor submits an application to purchase or redeem investor shares in a Sub-Fund on a continuous basis, within a short time period, exploiting differences in time zones and weaknesses or inefficiencies in computing the NAV.

4. The difference between these two practices (late trading and market timing) lies in the fact that in the latter, the practice is coordinated in the sense that the practice relates to various transactions which when taken overall generate a benefit. In the former, there is a single

INVESTMENT IN INVESTOR SHARES OF THE FUND HAS NO GUARANTEED RETURN AND PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RETURNS

EASTERNMED FUNDS VCIC PLC

transaction, which on its own generates a benefit for the person entering into the transaction or for another person on whose behalf the transaction has been entered into.

5. The Management Company has put in place procedures to prevent late trading and market timing practices, which it implements when examining and accepting applications to acquire or redeem investor shares that are submitted to the Management Company.

As part of those procedures, the Management Company reserves the right to reject applications from an investor where there are suspicions that these practices are being used, and it may take additional measures to protect other shareholders in the Sub-Fund.

6. The deadline for accepting applications to purchase or redeem investor shares in the Sub-Fund, which has been set for the purposes of internal procedures, is 14:30 hours each business day (cut-off time).

As a general rule, the investor must register for, redeem or convert investor shares without being aware of the Net Asset Value of the Sub-Fund.

7. Moreover, one criterion used to identify and prevent such practices, taking into account the investment policy of the Fund, is that transactions in investor shares are entered into with a frequency of two transactions per week per investor, but of course that does not mean that the Management Company prohibits transactions to redeem or purchase investor shares being entered into, since the main feature of the Fund is for investor shares to be redeemed and purchased if and when the shareholder so wishes.

2.6 INTEGRATION OF THE SUSTAINABILITY RISK WITHIN THE MEANING OF ART 6 OF SFDR

The Management Company identifies and analyses sustainability risk (i.e. an environmental, social, or governance event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of an investment) as part of its risk management process.

The Management Company integrates financially material sustainability risks and opportunities into its research, analysis and investment decision-making processes.

The Sub-funds, however do not promote environmental or social characteristics, and do not have as objective sustainable investment (as provided by articles 8 or 9 of SFDR).

Sustainability risk means an environmental, social, or governance event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a sub-fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks. Sustainability risks may have an impact on long-term risk adjusted returns for investors. Assessment of sustainability risks is complex and may be based on environmental, social, or governance information and data from third parties, which may be incomplete, inaccurate or unavailable.

As a result, the Investment Manager will assess a security or issuer on a best effort basis. The Investment Manager could not be responsible for the accuracy of this data.

Consequent impacts to the occurrence of sustainability risk can be numerous and various according to a specific risk, region or asset class. Generally, when sustainability risk occurs for

INVESTMENT IN INVESTOR SHARES OF THE FUND HAS NO GUARANTEED RETURN AND PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RETURNS

an asset, there will be a negative impact and potentially a total loss of its value and therefore an impact on the net asset value of the concerned sub-fund.

3. ASSET VALUATION PRINCIPLES, METHODOLOGIES FOR COMPUTING THE ISSUE AND REDEMPTION PRICE OF INVESTOR SHARES

3.1 VALUATION PRINCIPLES

The assets of the Sub-Fund shall be valued using the rules outlined below:

- (a) The value of transferable securities and money market instruments listed in a regulated market shall be calculated on the basis of the closing price of stock exchange transactions in cash on the same day. In regulated markets operating outside the European Union, when the valuation on the basis of the price referred to above is not possible due to time differences, the value shall be calculated on the basis of the closing price of such regulated markets on the previous business day.
- (b) If no stock exchange transaction was made on the date of valuation, account shall be taken of the price of the previous day when the regulated market was in session and, if no stock exchange transaction was made on that day either, account shall be taken of the last bid or ask price.
- (c) If the market, in which the transferable securities and money market instruments are listed, applies the system of single price, such single price shall be taken into account for the determination of their value.
- (d) To value assets denominated in another currency, their value will be translated into the reference currency (euro) at the reference exchange rate published by the European Central Bank on the same day.
- (e) Fees and expenses paid by the Fund to third parties that are known as annual expenses (such as the cost of the Fund's audit or other fees paid to advisors), are amortized or accrued throughout the calendar year, even though they may be paid annually or quarterly. In determining the net asset value, the appropriate portion of such fees is deducted from the value of the Fund's net assets. Fees and expenses that are not subject to such amortization are expensed as soon as they are incurred and deducted from the next net asset valuation.
- (f) If any errors are discovered in the valuation, these are corrected on the next valuation occurring after the error is identified, and the previous valuations are not restated to reflect the corrected information.
- (g) The Management Company generally intends to apply this Valuation Policy to the calculation of the net asset value on each valuation date. However, as a Management Company of the Fund, it reserves the right to amend this Valuation Policy from time to time at its sole discretion. The Management Company may amend this Valuation Policy in response to new circumstances that may arise which were not contemplated when this Valuation Policy was established.

2. To determine the net value of the investor shares of the Sub-Fund, the total Sub-Fund's net asset value shall be divided by the number of its existing investor shares. The determination of the Sub-Fund's net asset value is calculated in accordance with the valuation rules referred to above, after deducting its total liabilities from the total value of the Sub-Fund's assets in accordance with the Law and these Rules, and in particular the Management Company's fees and commission for managing the assets, including any performance fee specified, the fees of the depositary, trading commission, and any revenues and profits distributed to shareholders in accordance with the provisions of these Rules.

4. The value of the Sub-Fund's investor shares redeemed shall be paid in cash within four (4) working days from the date the application for the redemption of the investor shares is submitted.

5. The Management Company has the discretion to carry out the redemption in kind instead of cash, provided that the investor also agrees. Redemption in kind should not be used to meet redemption requests of retail investors in order to ensure retail investors' protection.

6. The investor shares of the Sub-Fund shall be redeemed at the redemption price on the date the shareholder's application for the redemption is submitted. The redemption price shall be calculated in accordance with these Rules.

9.1 MANAGEMENT COMPANY'S FEE & COMMISSION

1. **Subscription fee:** After submitting an application to acquire investor shares in a Sub-Fund, the shareholder may be charged a subscription fee payable to the Management Company, as a percentage of the overall value of the investor shares acquired. This fee is included in the investor share purchase price and is paid upon purchase of the shares. A fee is not charged for a subscription, when profits are distributed but the distributed funds are reinvested in new investor shares issued in the same Sub-Fund for the same shareholder.

2. **Redemption fee:** When investor shares of a particular Sub-Fund are redeemed, the shareholder may be charged a redemption fee payable to the Management Company, computed on the value of the investor shares being redeemed. The fee is withheld from the proceeds of the redemption payable to the shareholder. Where investor shares in the Sub-Fund are redeemed and the proceeds re-invested in the shares of another Sub-Fund of the Fund or another UCITS managed by the same Management Company, no redemption fee is charged.

3. **Fund management fee:** The Management Company is entitled to a Management fee which may vary based on the class of Investor shares held.

The fee is calculated per annum of the average net asset value of the particular Sub-Fund for the relevant financial year. The management fee is computed on the daily value of the Sub-Fund's net assets and is paid from the Sub-Fund's assets on a monthly basis in arrears. The management fee includes fees to enable the Management Company to perform its tasks and functions, or to provide services, irrespective of whether those functions is carried out by the Management Company itself or have been outsourced to third parties.

- (a) Commission, expenses and any taxes payable on transactions entered into on behalf of the Fund, are not related to the management fee but are payable by the Fund under the terms of the business relationship between the undertakings performing the tasks and the Fund.

- (c) The average daily value of the Sub-Fund's net assets includes fees and expenses paid by the Fund to third parties that are known as annual expenses (such as the cost of the Fund's audit or other fees paid to advisors). These are amortized or accrued throughout the calendar year, even though they may be paid annually or quarterly. In determining the net asset value, the appropriate portion of such fees is deducted from the daily value of the Sub-Fund's net assets. Fees and expenses that are not subject to such amortization are expensed as soon as they are incurred and deducted from the next net asset valuation.
- (d) When specific functions and activities of the Management Company which are included in the management fee are outsourced, there is no other fee or charge payable by the Fund for the functions and activities that were delegated to third parties.

9.2 DEPOSITARY'S FEE

The Depositary's fee for safekeeping services is based on the average net value of the Fund's assets held by the Depositary during the relevant financial year. The Depositary's fee is computed based on the daily valuation of the net assets held by the Depositary and is paid by debiting it from the Sub-Fund's assets on a quarterly basis in arrears. This fee includes Depositary fees which may be payable to third parties, who undertake to safeguard all or part of the assets of the Fund on the basis of outsourcing arrangements.

decision of the Commission. Without prejudice to the provisions of the rules that expressly regulate permissible deviations under the applicable legal framework, these rules do not otherwise deviate from the provisions of the applicable legislation.

Income and profits may be distributed to holders of investor shares as described in Paragraph 6 of the Prospectus. However, the strategy of the Sub-Fund is to achieve long term capital growth, and therefore, it is the intention for the entire income and profits to be reinvested.

Investor shares are classified into Class A investor shares and Class B investor shares. The rights and obligations of the two share classes are identical, with the exemption of the subscription, redemption and management fee charge as outlined in Paragraph 5 below. The Minimum Holding and Minimum Initial Subscription required for each class of Investor Shares, their ISINs and the reference currency of the Sub-Fund are shown in the below table:

Minimum Subscription Amount	<u>Class A Investors:</u> Minimum initial subscription €800,000 (eight hundred thousand euros) per investor, and minimum additional subscription €500,000 (five hundred thousand euros) per investor. <u>Class B Investors:</u> Minimum initial subscription and minimum additional subscription €5,000 (five thousand euros) per investor.

The above minimum initial and additional subscription amounts may be reduced or increased, at the discretion of the Sub-Fund, whenever this is considered reasonable or appropriate, taking into consideration the diversification of shareholders and other factors and subject to the provisions for amendment to the instruments of incorporation

The type and main features of investor shares and in particular the type of rights each investor share represents, the information and entries which demonstrate that someone has participated in the Sub-Fund, and the characteristics of and restrictions on the transfer of investor shares, as well as the technical details and the terms and conditions under which investor shares are issued and/or redeemed and the instance where the issue or redemption of investor shares may be suspended are described in Paragraph 4 of the Prospectus (Section A).

2. INVESTMENT OBJECTIVES, POLICY & LIMITS

2.1 INVESTMENT OBJECTIVES

The Sub-Fund's mission is to preserve the shareholders' wealth and to achieve long-term capital growth subject to moderate volatility with:

1. target (unlevered) return: 3-month Euribor +5% p.a.;
2. volatility: below relevant equity markets over the investment horizon;
3. investment horizon: 10+ years;

There is no guarantee that the Sub-Fund's investment objective will be achieved.

2.2 INVESTMENT STRATEGY

The Sub-Fund's investment strategy can be characterized as long-term, value-oriented and opportunistic. The Sub-Fund invests in highly liquid assets for the long term with emphasis on industries with real rather than intangible assets. While exposures and run comparisons will be monitored, there will not be at any time strict adherence to commonly used benchmarks. Economic and market risks will be closely monitored.

In "extreme" market conditions and in order to safeguard the interests of the Sub-Fund's shareholders, the Investment Manager may decide to liquidate part or the entire portfolio and invest up to 100% of the Sub-Fund's assets in cash and/or cash equivalents.

The strategy will focus on portfolio diversification and risk minimization. Risk will be assessed on individual investments as well as on a portfolio level.

The Sub-Fund may borrow on a temporary basis up to 10% of its net assets. The Sub-Fund may use financial derivative instruments for hedging purposes.

2.3 INVESTMENT POLICY

The Sub-Fund invests more than 50% and up to 100% of its Net Asset Value in listed Equities.

The Sub-Fund mainly invests in large capitalization (>\$10 billion), well-established European, but also US, companies with a recognizable brand name, solid market share and reputable management. The allocation in European and US equities will vary depending on macroeconomic and financial conditions, attractiveness of each region in terms of companies' valuations, financial risks and on the general investment strategy of the Investment Manager.

The Sub-Fund may also to a limited extent be allowed to invest opportunistically in less liquid mid and small-cap equities (< \$10 billion) up to 20% of NAV. Although European (but also US) equities will be the main investments of the Sub-Fund, up to 20% of NAV may be allocated to equities of other Developed markets while not more than 20% of NAV may be allocated to Emerging Markets equities.

The Sub-Fund's direct equity investments will concentrate on (a) companies with a solid real asset base in industries such as energy, materials, utilities, industrials, etc., (b) financial

companies such as banks and insurance companies and (c) healthcare. Investments in companies with high intangibles relative to their long-term assets, predominantly IT patents and brand names, will generally be avoided. Specifically, the Sub-Fund may invest up to 35% of NAV in energy, up to 30% of NAV in financials and up to 25% of NAV in each of all other equity sectors.

In order to supplement its direct equity investment activities, the Sub-Fund may further invest a portion of its assets (up to 25% of its net assets) in long-only equity funds (UCITS and Other UCIs) with Assets under Management (AuM) in excess of €500 million.

The Sub-Fund may finally invest less than 50% of its net assets in fixed income and cash (less than 50% of its net assets). Fixed income may also include investments in bond funds (e.g. UCITS, Other UCIs) and money market instruments, which should not exceed 10% of the Sub-fund's net assets.

The Sub-Fund's bond investments shall focus on developed market corporates as well as emerging markets bonds. Investments in Emerging Market High Yield bonds would be limited to instruments for which the Government, including state-owned entities, has an ownership stake of more than 50%.

The Sub-Fund will normally invest in low duration bonds (up to 3 years' maturities) as a means to mitigate credit and interest rate risk. Bonds will generally be deployed as an alternative to cash, preferably with a higher yield, and generally be kept until maturity. Nevertheless, the Investment Manager may also opt to invest in longer duration bonds in a high interest rate environment.

The Sub-Fund will aim to invest in bonds denominated in the Sub-Fund's base currency i.e. Euro, unless yields available are judged not to be competitive by the Investment Manager. In such case, as well as taking into consideration currency prospects, the Investment Manager may also choose to invest in non-EUR denominated bonds, but excluding Emerging Markets local currency bonds, for currency diversification and/or added yield. The Sub-Fund will not invest in ABS, MBS and convertible bonds (or contingent convertible bonds).

2.4 BENCHMARK INDEX

The Sub-Fund is actively run and the returns or investments of the Sub-Fund's portfolio are not compared against a benchmark.

3. PROFILE OF TYPICAL INVESTOR

The Sub-Fund is suitable for investors wishing to attain defined investment objectives and have sufficient knowledge and experience. The investor must have experience with volatile products. The Sub-Fund is suitable for investors with an investment horizon of 10 years and more.

EASTERNMED FUNDS VCIC PLC

The investor must be able to accept significant temporary losses. However, there can be no assurance that the investors will recover the assets originally invested in the Sub-Fund as the value of the Sub-Fund may either increase or decrease.

Investors in this Sub-Fund must be willing to assume a relatively high level of investment risk. The risk derives from the price volatility of the securities in which the Sub-Fund invests, especially equities and to a lesser degree bonds, as a result of changes at a macro- and micro-economic level. The portfolio is actively managed so as to minimize investment risk while also maximizing capital growth subject to moderate volatility.

The investments will concern highly liquid assets for the long term with emphasis on industries with real rather than intangible assets. While exposures will be monitored and comparisons will be conducted, the Sub-Fund will not at any time adhere strictly to commonly used benchmarks.

4. RISK MANAGEMENT

Taking into account the investment strategy pursued by the Sub-Fund and since the use of derivatives is limited, the Risk Management Function of the Management Company, in accordance with the provisions of CySec Circular CI78-2012-03, computes the overall exposure of the Sub-Fund to risk by using the Commitment approach as this is described in Directive 78-2012-03.

The Commitment approach has been selected taking into account the investment strategy pursued by the Sub-Fund and the fact that the use of derivatives shall be limited, and more specifically considering that:

- (a) the Sub-Fund does not adopt a complex investment strategy;
- (b) the Sub-Fund will not be exposed to exotic derivatives;
- (c) the commitment approach fully captures the market risk of the portfolio.

Portfolio diversification and risk minimization are of paramount importance and risk shall be assessed on individual investments as well as on portfolio level. The Sub-Fund may borrow on a temporary basis up to 10% of its net assets. The Sub-Fund may use financial derivative instruments for hedging purposes.

The risks entailed by investing in the Sub-Fund are outlined below:

Credit Risk is the risk of an issuer of a security held within the Sub-Fund not to be able to meet its obligations to the Sub-Fund.

Liquidity Risk is the risk that in difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its investor shares.

Systemic Risk is the risk arising from interdependencies among markets, which results in problems possibly appearing in one of them spreading to other markets. It involves the entire financial sector and not any individual market and appears in the form of chain reactions.

Currency Risk is the risk of an investment's value being affected by changes in exchange rates and affects investments in financial instruments which are traded in a different currency or in foreign exchange markets.

Regulatory and Legal Risk refers to the regulatory and legal framework in the country of the investment. Any change in the legal, tax or regulatory framework may have an impact on an investment.

Political Risk refers to the risk of political changes or instability in a country that may affect the investments of the Sub-Fund.

Capital Risk is the risk that expenses of the Sub-Fund may be paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth capital erosion may occur.

Management Risk refers to the risk associated with ineffective, destructive or underperforming management which is detrimental to the interests of shareholders of the Sub-Fund.

**INVESTMENT IN INVESTOR SHARES OF THE FUND HAS NO GUARANTEED RETURN AND

General economic conditions risk refers to the risk that economic conditions change over time and the effect of those changes to the investments of the Sub-Fund.

Developing/emerging Markets: The risks of foreign investments typically are greater in less developed countries, sometimes referred to as developing or emerging markets.

Geographical risk: The Sub-Fund may from time to time invest a substantial amount of its assets in securities located in a single country or a limited number of countries. Adverse economic, political or social conditions in those countries may therefore have a significant negative impact on the Sub-Fund's investment performance.
